

# Perlite - Tank neutralisation

If a fuel tank cannot be removed, filling it with perlite is a simple and safe way of neutralising it.

## Why choose perlite to neutralise tanks?

Perlite is an inert, approved mineral offering a number of advantages:

- ✓ **Lightweight** and easy to handle, especially for hard-to-reach tanks.
- ✓ **Natural product**.
- ✓ **Easy to dispose of** when necessary.
- ✓ **Absorbs odours** and limits the risks associated with fuel residues.
- ✓ To be carried out by an approved professional.

<b>Form</b>	Solid granules
<b>Colour</b>	White, grey
<b>Density</b>	2.0 - 2.2 g/cm <sup>3</sup>
<b>Bulk</b>	80 kg/m <sup>3</sup> ± 20%
<b>pH</b>	6-8.5
<b>Fire classification</b>	A1
<b>Organic ingredients</b>	< 0.1 % weight in percent
<b>Granulometry</b>	0-6 mm
<b>Flammability</b>	Inflammable, inorganic
